### EverClean® System

The EverClean system, exclusively from American Standard, is the easiest way to help keep your whirlpool system clean.

- Patented silver-ion additive is molded directly into the circulation piping protecting them from mold, mildew, algae and fungus that could cause deterioration or staining.
- Will not wear off & works around the clock no matter how often you use your whirlpool.
- Competitive whirlpool cleaning systems using ozone operate only while the motor is running which will not help when water gets into the jets or piping during bathing.
